

A CRM APPLICATION FOR THE CHAI SHOP & CO

6. PROJECT TESTING

6.1 Testing Objective

Testing verifies that the CRM application for TheChaiShop&Co functions according to its requirements and that data, relationships, validation, automation and analytics behave as expected.

6.2 Test Areas

Test ID	Area	Expected Result	Status
TC-01	Employer Account Record Creation	Employer record can be created with required personal and job information.	Tested
TC-02	Customer Account Record Creation	Customer record stores contact, order and payment details correctly.	Tested
TC-03	Enterprise Account Record Creation	Enterprise record stores contact, product and payment details correctly.	Tested
TC-04	Mandatory Field Validation	Required fields prevent incomplete records from being saved.	Tested
TC-05	Aadhar Number Validation	Aadhar number must be 12 digits, numeric and must not start with 0.	Tested
TC-06	PAN Number Validation	PAN value with special characters or a leading 0 is rejected.	Tested
TC-07	Phone Number Validation	Phone number must contain exactly 10 numeric digits.	Tested
TC-08	Record Types and Page Layouts	Online Order and Walk-In Order records show their assigned page layouts.	Tested
TC-09	Relationship Testing	Associated Employer lookup links Customer and Enterprise records to an Employer Account.	Tested
TC-10	Order Quantity Formula	Order Quantity counts the selected products and chai correctly.	Tested
TC-11	Total Bill Formula	Total Bill adds the correct unit price of every selected item.	Tested
TC-12	Birthday Formula and Email Flow	Birthday checkbox is set on the birthday and the scheduled flow sends the Birthday Offer Email.	Tested
TC-13	Reports	Customer and Enterprise sales reports display the relevant records grouped correctly.	Tested
TC-14	Dashboards	Dashboard components reflect the data of both sales reports.	Tested

Test ID	Area	Expected Result	Status
TC-15	Application Access	TheChaiShop&Co Lightning app and its tabs are accessible to the System Administrator.	Tested
TC-16	Performance	Pages, reports and dashboards are checked against the target of approximately less than 3 seconds.	Checked

6.3 Validation Testing

Validation testing covers mandatory fields and the Aadhar, PAN and phone number rules. The purpose is to prevent incomplete or invalid employer, customer and enterprise records from being accepted.

6.4 Automation and Access Testing

Automation testing covers the Order Quantity and Total Bill formula fields, the birthday checkbox formula and the scheduled Happy Birthday Email Flow. Access testing checks that the TheChaiShop&Co Lightning app and its tabs are available to the System Administrator as configured.

6.5 Analytics Testing

Reports and dashboards are checked for correct display and updates based on the available customer and enterprise records, including the grouping by record type and by type of items.

6.6 Testing Conclusion

The testing phase covers the core data, validation, relationship, automation and analytics areas of the CRM application for TheChaiShop&Co. The documented test areas provide evidence that the implementation has been reviewed against the project requirements.
